

TPA Total Solution

(Human Resource Development with Creative Activities)

We focus on activities on the field as our enjoyable learning and challenging with the contents that meet the activity purposes.

The game is not to win or lose, but rather is to solve problem as a group (Problem Solving). Creative thinking (KAIZEN) is the main activity to support on human development in order to achieve goals, add our values, make decision in various circumstances, and respect in various and different characteristics of people in a group.

TPA can provide courses and activities that fit to the needs, vision, and mission of organization in various forms by our professional team with over 20 years of experiences. We focus on meet the needs of group activity, walk rally, team building, youth camp, environmental conservation, and CSR activity.

1 Group Activity

Group activity focuses on building a relationship among each member in a group in order to strengthen the relationship between old and new employees. By having fun activities to gather everyone to come together, the training provides outcomes on having the right knowledge, the right understanding, the right perspective on work and supports on behavior change under enjoyable atmosphere, which helps participants to be motivated at all times.

2

Team Building

Team building focuses on process and analysis during activities which focus on building a good relationship and learn from each other among managers, supervisors, and employees. Also, it focuses on understanding of our organizations, our roles and responsibilities, working as a team to achieve organization's goals, work with KAIZEN for organization's stability and achievement, having a good communication and trust among employees, and having a responsibility for society and environment.

3

Walk Rally

Walk rally focuses on human resource development in organization by having various activities to challenge capability of participants, to develop relationship among organization's employees, and to develop work capability for each level of employees by having everyone participates in specific circumstances that have been set.

4

Robot Contest

TPA robot contest for youth provides students to use their abilities to design and develop robot program effectively without limitation of formats. Students will use their knowledge, capabilities, and working as a team to brainstorm and create a robot, which is the scientific and technology invention for idea development.

5

Youth Camp

The youth camp provides learning from experiences to the youth and gives knowledge to them in a form of camping. It is a new method of learning, which focuses on Play & Learn. The camp supports on thinking and assertiveness skills from real experiences with meet the needs in various forms.

6

CSR Activity

Our CSR activity is 5S Watsangsook Project, which provides happiness, fun, and merit by 5S system. The project focuses on organization development to reduce waste with CSR model as "Watsangsook by 5S to Organization and Society".

7

Environmental Responsibility

- Growing plants for animals and sustainable lives
- Building dams for the richness of nature
- Salt licks for animal hospital

8
